

Frequently Asked Questions

One-Click® PRO Cleaner

Question 1	What's different about the One-Click PRO cleaner from the standard One-Click?
Answer	The new One-Click Cleaner PRO features an integrated guide cap design for cleaning ferrule end-face on connectors, in or out of bulkhead adapters. It also includes an increased cleaning cycle capacity over the standard One-Click cleaners.
Question 2	How many cleans does the One-Click PRO have?
Answer	The number of cleans has been increased to 775 from the standard 500.
Question 3	What connectors does the PRO currently work with?
Answer	AFL offers PRO cleaners for SC & LC connectors. Part numbers: 8500-05-PRO-SC: One-Click Cleaner SC PRO 8500-05-PRO-LC: One-Click Cleaner LC PRO
Question 4	Will the One-Click PRO replace the standard One-Clicks?
Answer	No, the One-Click PRO cleaners will not be replacing the standard One-Click and these legacy cleaners will still be available for ordering.
Question 5	How much time can I save?
Answer	With the new design of the One-Click PRO and its integrated guide cap, it is estimated that a user can speed up the cleaning process by 50% over a standard One-Click cleaner. By eliminating the need to switch caps for cleaning ferrule end-face on connectors or through bulkhead adapters.
