

## DESCRIPTION

Tempo's MCTAP Version 1.0 Software System is a Windows based program for viewing and analyzing waveforms acquired by Tempo TS100, TS200 and TV220 metallic time-domain Reflectometer.

The saved traces are easily uploaded to your computer by connecting the included serial cable. The software system provides a convenient method for managing your data. The saved waveform images can be exported to BMP, JPEG, GIF, and TIFF format files. The waveform data can be exported as text or spreadsheet-compatible files.
